PROFESSIONAL PROFILE

Results-driven IT Support Engineer with 7+ years of experience managing enterprise IT infrastructure and delivering high-quality technical support. Expert in deploying, configuring, and troubleshooting Windows environments to ensure zero business interruption. Proven track record in optimizing workflows through proactive system monitoring and Active Directory management.

WORK EXPERIENCE

NOOR FANOS TRADING COMPANY

Buraidha, Al-Qassim, KSA

IT Support Engineer

Feb 2024 – Present

A premier Saudi-based lighting and smart home solutions enterprise with a nationwide retail network.

- Managed Windows Active Directory, Domain Controllers, and implemented Group Policy Objects (GPOs) to enforce organizational security policies.
- Configured and optimized pfSense firewall settings, safeguarding company data and network perimeter.
- Installed and configured VMware ESXi hypervisor on server hardware, establishing a virtualized infrastructure foundation for the organization.
- Created and managed multiple virtual machines (VMs) with configured virtual networking (vSwitches, port groups), enabling efficient resource utilization and simplified server management.
- Planned and executed end-to-end CCTV surveillance system installations including camera positioning, DVR/NVR configuration, and remote monitoring setup.
- Performed fiber optic cable splicing and termination using fusion splicing techniques, ensuring low signal loss and high-speed connectivity.
- Resolved complex technical issues via remote screen-sharing sessions, ensuring 100% hardware readiness and software compliance.

ASTAR MOBILES PVT LTD.

Chennai, India

IT Support Engineer

Aug 2020 – Sep 2023

A leading retail and multi-branch enterprise specializing in premium pre-owned smartphones and electronics.

- Resolved cross-platform hardware and software issues for high-priority computer support requests.
- Collaborated with senior technical managers to escalate and provide strategic solutions for unresolved critical issues.
- Conducted root cause analysis through direct client communication and remote diagnostic sessions.
- Delivered expert technical assistance for Windows operating systems, ensuring seamless user experience.

SKYPRO TECHNOLOGIES PVT LTD

Bangalore, India

IT Support Engineer

Dec 2018 – Mar 2020

An enterprise IT services and technical staffing organization specializing in infrastructure management and support solutions.

- Managed a high-volume service management ticket queue, ensuring all high-priority requests were addressed within SLA.
- Oversaw the deployment and maintenance of desktop systems, handling all daily technical support operations.
- Standardized the setup and configuration of desktop computers and peripherals across the organization.
- Deployed and monitored enterprise-grade antivirus software to maintain a secure and threat-free IT infrastructure.
- Analyzed system performance metrics to identify and resolve potential hardware and software bottlenecks proactively.
